

Daniella STEEL

Dr Daniella Steel
Scientist
Cellartis AB

Daniella is a scientist with Cellartis AS, involved in the research and development of stem cells for drug discovery and safety. In particular, Daniella's work focuses on the differentiation and application of stem cell-derived cardiomyocytes.

After completing a PhD in electrophysiology from Imperial College London, Dr Steel gained international experience working in Canada and Sweden. Dr Steel has worked extensively in academia, gaining expertise in biosensor technology and the use of nanosurfaces to steer differentiation stem cell.
